Your Daily Service Partner

Version 2.0 -: What's new

Created By-: Satyam Jain

August 2025

Introductory Note

This document highlights the new features, improvements, and enhancements introduced in Version 2 of *Home Support: Your Daily Service Partner*. It focuses on technical updates, UI/UX improvements, and functional changes made since Version 1. The purpose of this document is to provide a concise summary of all significant updates, so that users, team members, or reviewers can quickly understand the progress and improvements made in the current version.

Technical Changes

This section highlights the technical improvements and backend updates implemented in Version 2.

User Panel

- Unified all service request frames into a single request frame.
- Input fields standardized using ComboBoxes (replaced previous TextFields).
- Validation added to ensure accurate and consistent data entry.

Company Panel

- Task pending count for service partners automatically increments when a request is assigned.
- Request handling logic updated to accommodate merged request frame.

Admin Panel

- Employee Block: Add, remove, view, and search employee records.
- Service Partner Block:
 - Add/ Remove Service Partner.
 - Multi-filter search (service type, status, task pending count).
 - For Appliance Care: filter by appliance type and brand.
- Request Block: Monitor all user requests efficiently.
- Admin Head Block: Manage admin profile and settings.

Database & Demo Data

- New tables added for Admin and Employee modules.
- Clean dataset (~50 demo records) created via UI forms.
- Standardized values ensure accurate filtering and reporting.

• Other Improvements

- Bug fixes and performance enhancements.
- Improved UI layouts across panels.

Visual / UI Changes

- **Home Frame Updates:**

- Previous labels replaced with **buttons**.
- Icons previously on labels are now added to **buttons** for better interactivity.
- Some buttons replaced with **labels** to maintain cleaner layout.
- Logo updated on the home frame.

Note: No major panel redesigns; visual changes are mostly **minor UI improvements** for usability and consistency

Next Version Scope / Planned Features

Next Version Scope / Planned Features (Updated)

- **User Panel:**

- Users will be able to view their assigned service partners.
- OTP validation for login/sign-in.
- Payment options integration for services.

- **Service Partner Panel (Under Development):**

- View and manage assigned tasks.
- Billing, invoices, and payment tracking.
- Task status updates and reporting.

• **Admin / Company Panel:**

- Automation of bulk operations and enhanced analytics.
- Improved filter performance and reporting.

Note: These features are planned for future versions and are not included in the current Version 2 release.
